

# ISO 9001:2015 AWARENESS AND CONVERSION

## Professional Training in ISO 9001:2015

In 2015 the International Accreditation Forum published the revised and updated ISO 9001:2015 Quality Management Standard that requires transition planning and execution for companies that currently subscribe to the global quality management standard.

The new ISO 9001 revision introduces significant changes and increases the reach and scope of the quality management system internal and external to the organization. The one-day training program provides an overview of the new Standard; increases understanding of the context and changes of the new ISO 9001:2015 Standard; and identifies activities that should be considered for its transition and implementation.

## Who Should Attend?

- Executive Managers
- Quality Managers
- Quality Auditors
- Production and Manufacturing Managers
- SHEQ Managers
- Consulting Engineers
- All personnel involved in the planning, implementing and execution of quality management systems

## Outcomes of the Training

- To understand the changes and new requirements of ISO 9001: 2015.
- To understand the context of the organization as determined by the Standard.
- To be aware of the Standard's enhanced Leadership requirements.
- To gain knowledge of the process approach and the PDCA cycle.
- To understand risk-based thinking and how it impacts on strategic business planning in the organization.

- To understand the requirement for knowledge-based systems.
- To develop a practical and efficient QMS transition project plan.

### Accreditation

The one-day training is accredited for ECSA CPD.
